Abstract

10-1-68

1. The first of these is the fact that the United States has a long and distinguished record of support for the United Nations. This record is reflected in the fact that the United States has been a member of the United Nations since its inception in 1945, and has been a leading contributor to the United Nations budget. The United States has also been a leading proponent of the United Nations' efforts to maintain international peace and security, and to promote human rights and development.

Subject: ATTACHED BIRTH CERTIFICATE

The attached birth certificate is for Vivian Irene Lents who was born at Lewiston in 1919. Her older sister, Mrs. Lila Dankenbring, gave me the information regarding the birth that she knew. Dr. J. M. Lyle, who delivered Vivian at St. Joseph's Hospital May 6, 1919, accompanied her to this office. The Hospital was unable to find records of this birth, but the sister and doctor are both sure that such information has been misplaced since the birth did occur there.

Mrs. Dankenbring states that she is not sure of her parent's age at the time Vivian was born. She believes her father was approximately 40 and her mother approximately 36. Since she was not definite about this I did not put it on the certificate.

I hope this is satisfactory for filing, and if so, enclosed is 50¢ so that a copy can be sent to Vivian, now Mrs. George E. Fisher, Astoria, Oregon.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were grown in YEA medium for 24 h at 28 °C. The cell concentration was adjusted to 10⁸ cells/ml. The cells were then mixed with the plant tissue and the transformation efficiency was determined. The results are shown as the mean ± SD of three independent experiments. The asterisk indicates a significant difference (p < 0.05) between the control and the treated groups.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

...and the fact that the system is not yet fully operational, the Commission has decided to postpone the final decision on the system until the end of 1992.

The image is a severely degraded scan of a document. It features a circular stamp on the right side with the word "PUBLIC" and some numbers. At the bottom, there is a line of text that is partially legible, mentioning "The United States of America". The rest of the page is obscured by noise and illegible text.

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the East (CLPE) in the United States. This is a serious matter, as the CLPE is a known and active organization which has been operating in the United States for many years. It is therefore essential that the Commission be kept informed of any developments in this regard.

Note of explanation of place of birth:

Presto was the one room school where I went to school. It was a half mile from my father's home where I was born.

Frith is the nearest town of any size, and the mail route.

Stoken is the F. P. of Ward where we attended church. I hope this information will be helpful to you.

Sincerely,

Allan F. Larsen

1. The first step in the process of identifying a problem is to determine the scope of the problem. This involves identifying the area of the organization that is affected by the problem and the extent of the problem. For example, if the problem is a decrease in sales, the scope of the problem would be the sales department and the extent of the problem would be the decrease in sales.
